

## Briefing Paper 2011 Census – Release 1 – Results for Glasgow City

### Population and Household Change 2001-2011

National Records of Scotland (NRS) have now published population and household estimates from the 2011 Census (releases 1C1 on 23<sup>rd</sup> July 2013 and 1C2 on 15<sup>th</sup> August 2013). These are estimates as per Census day, i.e. 27 March 2011.

Earlier releases from the 2011 Census (1A on 17<sup>th</sup> December 2012 and 1B on 21<sup>st</sup> March 2013) contained **rounded** estimates at a lower level of detail (e.g. by 5-year age-band and **not** by single year of age) at Scotland level and for Council areas. The newer release 1C1 gives the **unrounded** population estimates by single age and sex and the **unrounded** household estimates for Council areas and Health Board areas.

Release 1C2 contains geography products, as well as a count of total population and total households for small areas (postcode and output areas). That data gives the opportunity to look at population and household change **within the City**.

This briefing paper examines population and household change, between 2001 and 2011, both City-wide and for Wards and Neighbourhoods in Glasgow.

***The estimates given in this paper are the most up-to-date and therefore they supersede the earlier estimates for 2011 from NRS (the pre-Census estimates).***

### Main results

#### City-wide Population Change

The population of Glasgow has increased by 2.7%, from 577,869 in 2001 to 593,245 in 2011 (see Table 1). The rate of increase is lower than in the rest of Scotland. In Scotland the population rose by 4.6%, from 5,062,011 in 2001 to 5,295,403 in 2011.

**Table 1 - Population and Households in Glasgow City in 2001 and 2011**

	2001	2011	change	% change Glasgow	% change Scotland
total population	577,869	593,245	15,376	2.7%	4.6%

## City-wide Population Change by Age

The number of children (age 0 to 15) in Glasgow fell by 10.2%, from 106,498 in 2001 to 95,627 in 2011 (see Table 1). The share of this age group in the total population fell from 18.4% in 2001 to 16.1% in 2011. The number of children in Scotland fell by 5.7%, from 972,065 in 2001 to 916,331 in 2011. The share of this age group in the total population fell from 19.2% in 2001 to 17.3% in 2011.

The number of adults aged 16 to 64 in Glasgow rose by 9.1%, from 380,679 in 2001 to 415,453 in 2011. The share of this age group in the total population rose from 65.9% in 2001 to 70.0% in 2011. The number of adults aged 16 to 64 in Scotland rose by 6.2%, from 3,285,046 in 2001 to 3,488,738 in 2011. The share of this age group in the total population rose from 64.9% in 2001 to 65.9% in 2011.

The number of adults aged 65 and over in Glasgow fell by 9.4%, from 90,692 in 2001 to 82,165 in 2011. The share of this age group in the total population fell from 15.7% in 2001 to 13.9% in 2011. The population aged 65 and over in Scotland rose by 10.6%, from 804,900 in 2001 to 890,334 in 2011. The share of this age group in the total population rose from 15.9% in 2001 to 16.8% in 2011.

## City-wide Household Change

Table 1 shows that the number of households in Glasgow has increased by 5.2%, from 271,596 in 2001 to 285,693 in 2011. The rate of increase is lower than in the rest of Scotland, where the number of households rose by 8.2%, from 2,192,246 in 2001 to 2,372,777 in 2011.

In Glasgow the average household size fell by 2.9%, from 2.08 in 2001 to 2.02 in 2011. In Scotland the average household size fell by 3.5%, from 2.27 in 2001 to 2.19 in 2011.

## Population and Household Change by Ward

It is clear, from Map 1 (see next page) and Table A3 (see Appendix), that the largest population increases between 2001 and 2011 took place in three Wards north of the river Clyde: Partick West (+13%), Anderston/City (+34%) and Calton (+14%). In the South West of the City, the population in the Greater Pollok Ward rose by 11%.

The Springburn Ward had the highest rate of population loss (-10%). There were also significant population losses in the following Wards: North East (-5%), Shettleston (-4%), Newlands/Auldburn (-4%), Craigton (-3%) and Maryhill/Kelvin (-3%).

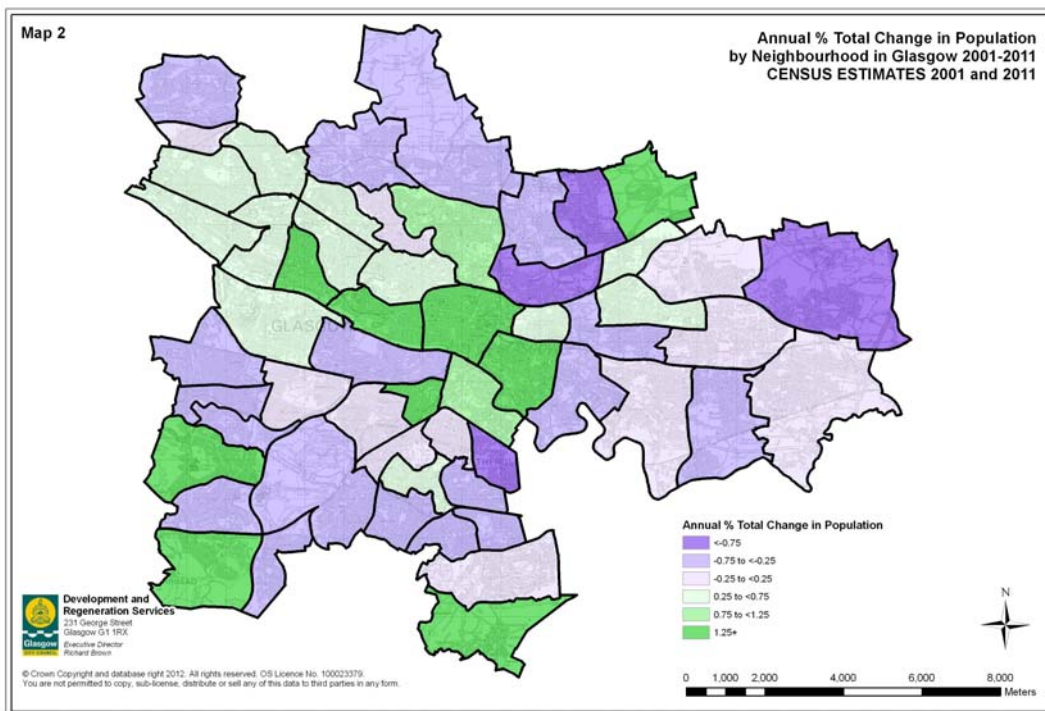

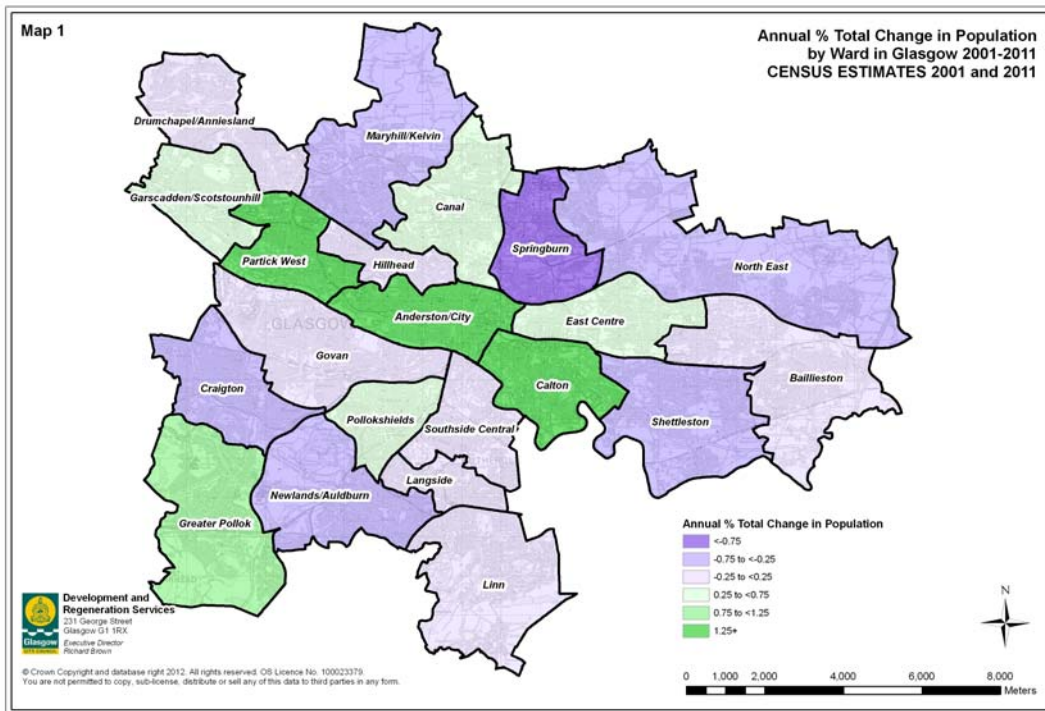

A comparison of the figures in Tables A3 and A4 shows that the pattern of change in the number of **households** by Ward is very similar to the pattern of **population** change by Ward. In 2001-2011, there was a rise in the number of households of 36% in Anderston/City, with rises of 17% in Partick West and Calton and a rise of 12% in Greater Pollok. The number of households fell by 11% in the Springburn Ward.

## Population and Household Change by Neighbourhood.

It is clear, from Map 2 and Table A5, that the largest population increases took place in the following neighbourhoods: Broomhill and Partick West (+22%), Yorkhill and Anderston (+28%), City Centre and Merchant City (+36%) and Calton and Bridgeton (+28%). In the South and South West of the City, there was a sizable population rise in the neighbourhoods Pollok (+22%), South Nitshill and Darnley (+31%) and Carmunnock (+24%).

Easterhouse had the highest rate of population loss (-17%), to be followed by Sighthill, Roystonhill and Germiston (-14%), Balornock and Barmulloch (-9%) and Toryglen (-9%).

Again, the pattern of change in the number of **households** by Neighbourhood is very similar to the pattern of **population** change by Neighbourhood (see Tables A5 and A6).

## APPENDIX

The Appendix contains:

- (1) Tables A1 and A2, which give statistics on Glasgow's population by age/sex;
- (2) Tables A3 to A6, which give the changes in population and households for Wards and for Neighbourhoods; and,
- (3) a Map of the 56 Neighbourhood areas in Glasgow.

In Tables A3 to A6, both Wards and Neighbourhoods are grouped together to the three Strategic Planning Areas for the City. This represents a change in relation to earlier papers, where the neighbourhoods were grouped to the ten (former) Community Planning Partnership areas.

***This has made it necessary to make a small change to the neighbourhood definitions, in terms of data zones, in order to harmonise the neighbourhood definitions with the ward definitions. Given this change, the opportunity has been taken to make some further adjustments to the neighbourhood definitions, in order to eliminate some discrepancies with the definitions used in the Understanding Glasgow website.***

As a result of this, there have been adjustments to the population and household numbers of the following neighbourhoods:

upward adjustment	downward adjustment
Hyndland, Dowanhill & Partick East	Broomhill & Partick West
Ruchill & Possilpark	Springburn
Pollokshields East	Shawlands & Strathbungo

The adjustment has been applied to both the 2001 and 2011 estimates, so that these figures, in Tables A5 and A6, can be compared.
