

About the Service

Neighbourhoods, Regeneration & Sustainability (NRS) provide a Community Payback Service to all communities within the Glasgow City Council boundary. The service supports the city's agenda to clean and enhance selected sites across the city. It undertakes a variety of community enhancement projects, which can include various beneficiaries: community organisations, partnerships, faith groups, churches, schools and charities.

The service also operates wood workshops, which manufacture and refurbish set items such as planters and bird tables. These items are distributed free of charge to community groups, schools and Neighbourhood Improvement Volunteers (NIV's)

The service works with people who have been involved in offending behaviour and delivers the un-paid work element of a Community Payback Order. This order allows individuals to put something positive back into their communities through a Community Sentence. Each individual is carefully assessed before they are assigned to a work project, and are supervised by Community Payback Officers whilst on site.

What do we do?

The following is a sample of work that the service regularly undertakes:

- **General gardening projects • Improvements to park and community facilities**
- **Manufacturing and repairing equipment for community gardens**
- **Painting and decorating in community centres, schools and meeting places**
- **Enhancing open spaces**

Although we provide the labour, nominees are asked to provide materials for the work such as paint, plants or building materials.

How do I nominate?

If you have a site/project or require products from Community Payback Services you should complete the nomination form and return it to the email or postal address provided.

On receipt of your nomination the named nominee will be contacted to discuss the request in more detail in order to determine if the nomination is suitable for the Community Payback Services to undertake.

Before requesting work, please consider the following criteria which may be required to allow the work to take place:

- **The work will be of benefit to the local community**
- **Is there nearby access to electricity, running water and toilet facilities?**

Such matters will be discussed further when you are contacted.

OFFICIAL SENSITIVE: Personal Data

Organisation	
Address	
Contact Name	
Telephone Number	
E-mail Address	
Date Nomination Completed	
Description of organization & who will benefit from the service	
Details of work site location
