Have you ever wondered how Wee Forests benefits your community? Find out how by attending your local Wee Forest Community Afternoon!

We'd love for you to come and join us so together we can understand more about the environmental and social benefits that your Wee Forest brings to the community here in Glasgow Green.

Over the course of the afternoon, you will learn about:

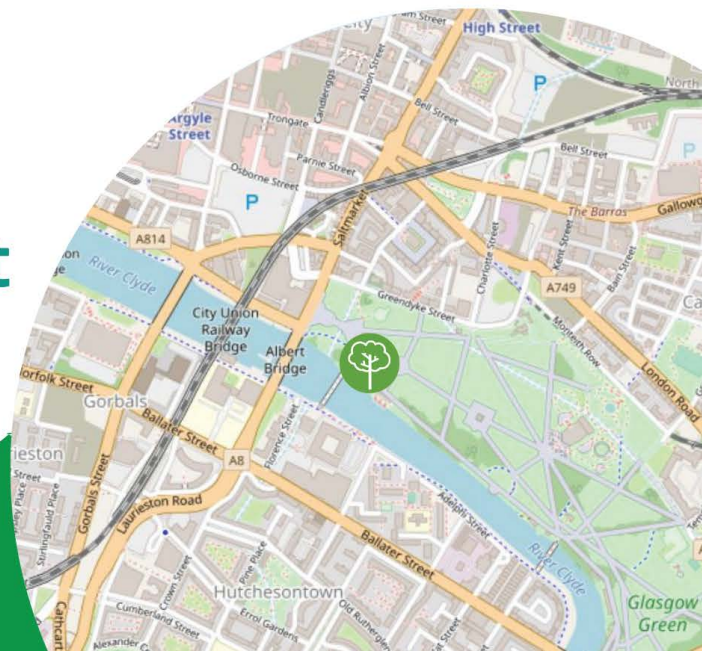

- Wildlife in the forest including butterflies, bees, and bugs
- How trees can capture and store carbon from the air we breathe
- The forest's ability to store water
- The cooling benefits of the trees

Follow the link above to register and book your session. Feel free to sign up for as many sessions as you like!

The community science event is free to attend and suitable for all ages
