Subject: Re: Broomhill Avenue Greenspace

Dear [REDACTED]

I am writing in support of the proposal to have the Broomhill Avenue Greenspace leased to the community over the next 25 years. The space has become an important community focal point in recent times with members of the local community coming together and working together to improve the site. If the proposal was to go ahead, the community aspect of the space would be further enhanced with the proposals to create seating in the space and to encourage wildlife with the planting of hedgerows and wildlife friendly trees and meadows. I am aware that this use of the Greenspace has had the support of the Broomhill Community Council, and elected representatives at a local and national level. I sincerely hope that the Development and Regeneration Services section of Glasgow City Council will be able to follow suit.

Yours sincerely
