Item 2

19th November 2013

2011 CENSUS – KEY STATISTICS

Purpose of Report:

To inform Committee of 2011 Census results, published by National Records of Scotland on 26th September 2013.

Recommendations:

That Committee note:

- the results, for Glasgow, of the 2011 Census releases 1 and 2A;
- the need to consider the implications for planning and service provision of recent changes in population and households; and,
- the DRS programme of further reports on the 2011 Census results, as NRS makes more releases of the Census data.

Ward No(s):

Citywide:

Local member(s) advised: Yes No

Consulted: Yes No

PLEASE NOTE THE FOLLOWING:

Any Ordnance Survey mapping included within this Report is provided by Glasgow City Council under licence from the Ordnance Survey in order to fulfil its public function to make available Council-held public domain information. Persons viewing this mapping should contact Ordnance Survey Copyright for advice where they wish to licence Ordnance Survey mapping/map data for their own use. The OS web site can be found at "<http://www.ordnancesurvey.co.uk>". If accessing this Report via the Internet, please note that any mapping is for illustrative purposes only and is not true to any marked scale.

1. INTRODUCTION

- 1.1 On 21st March 2013, National Records of Scotland (NRS) published rounded estimates of population and households for council areas in Scotland, based on the 2011 Census. These population and household estimates, set in the context of past and projected changes, were reported to the Committee at its' meeting on 23rd April 2013.
- 1.2 Since then, NRS has published unrounded estimates of population and households for council and health board areas and for smaller areas (release 1C, on 23rd July and 15th August 2013). NRS has also published, for each council and health board area in Scotland, a set of key statistics from the 2011 Census on: (1) ethnicity, religion, language and identity; (2) health, (3) population and (4) housing and accommodation (release 2A, on 26th September 2013).
- 1.3 This report focuses on:
 - the City-wide 2011 Census results, from release 2A, and
 - the estimated population and household estimates for Wards and Neighbourhoods in the City, from release 1C.
- 1.4 A further release (2B) is expected on 14th November 2013, when NRS will publish key statistics on: (1) education and (2) the labour market. At that date, all the key statistics published so far will be available at small area level. In mid-December, NRS plan to publish the remaining key statistics, for living arrangements, long term health conditions, central heating and number of rooms (release 2C), both for council and health board areas and for smaller areas.
- 1.5 Key Statistics Tables are only for a single variable (e.g. population by age). As from early 2014, NRS plan to publish multivariate Tables (e.g. population by age **and** economic status) as part of releases 3 (local characteristics and local themes) and 4 (detailed characteristics and themes).
- 1.6 This summary report gives, in sections 2 to 6, an overview of the main Census results that have been published so far. Section 7 points out that the implications of these results for Council services need to be considered. Detailed Tables (Tables A1 to A13) are provided in the Appendix.

2. POPULATION AND HOUSEHOLDS

City-wide Population Change

- 2.1 The population of Glasgow has increased by 2.7%, from 577,869 in 2001 to 593,245 in 2011 (see Appendix, Table A1). The rate of increase is lower than in the rest of Scotland. In Scotland the population rose by 4.6%.

City-wide Population Change by Age

Graph 1 - Population change by Age for Glasgow and Scotland in 2001-2011

- 2.2 The number of children (age 0 to 15) in **Glasgow** fell by 10.2%, from 106,498 in 2001 to 95,627 in 2011 (see Graph 1 above, and Appendix, Table A1). The number of children in **Scotland** fell by 5.7%.
- 2.3 The number of adults aged 16 to 64 in **Glasgow** rose by 9.1%, from 380,679 in 2001 to 415,453 in 2011. In **Scotland** the number of adults aged 16 to 64 in Scotland rose by a lower percentage (6.2%). The main reason why the growth rate in Glasgow is higher than the national rate is a rise of 18.0% in the number of adults age 16-29 in Glasgow (in Scotland: 10.7%).
- 2.4 The number of adults aged 65 and over in **Glasgow fell** by 9.4%, from 90,692 in 2001 to 82,165 in 2011. The share of this age group in the total population **fell** from 15.7% in 2001 to 13.9% in 2011. In **Scotland**, the population aged 65 and over **rose** by 10.6% and the share of this age group in the total population **rose** from 15.9% in 2001 to 16.8% in 2011.
- 2.5 In comparison with Scotland, Glasgow's population in 2011 has:
- fewer children (16.1% of population; Scotland: 17.3%)
 - more adults age 16 to 64 (70.0% of population; Scotland: 65.9%)
 - fewer adults age 65+ (13.9% of population; Scotland: 16.8%)
- Table A3 in the Appendix shows how, in 2001 to 2011, the population shares have changed for various age groups in Glasgow and in Scotland.

Comparison Glasgow with other UK Cities

- 2.6 The fact that Glasgow's population has grown during 2001 to 2011 represents substantial progress, when set against rates of decline in previous decades. Yet the rate of growth, at 2.7%, is low compared with the rate of growth achieved by other UK Cities (see Graph 2). Only Dundee had a lower rate of growth, at 1.1%. Manchester had the highest growth rate, at 28.1%.

Graph 2 - Population change for Glasgow and other UK Cities in 2001-2011

- 2.7 The pattern of a (relatively) higher growth rate for working age adults and higher losses, or lower increases, for pension age adults than national rates is also prevalent in other UK Cities (see Appendix, Tables A6 and A7). This is particularly the case for Manchester, where the share of the population for the age group 16 to 64 rose from 65.7% in 2001 to 71.2% in 2011 and the share of the population for the age group 65+ fell from 13.2% in 2001 to 9.4% in 2011.

Marital and Civil Partnership Status

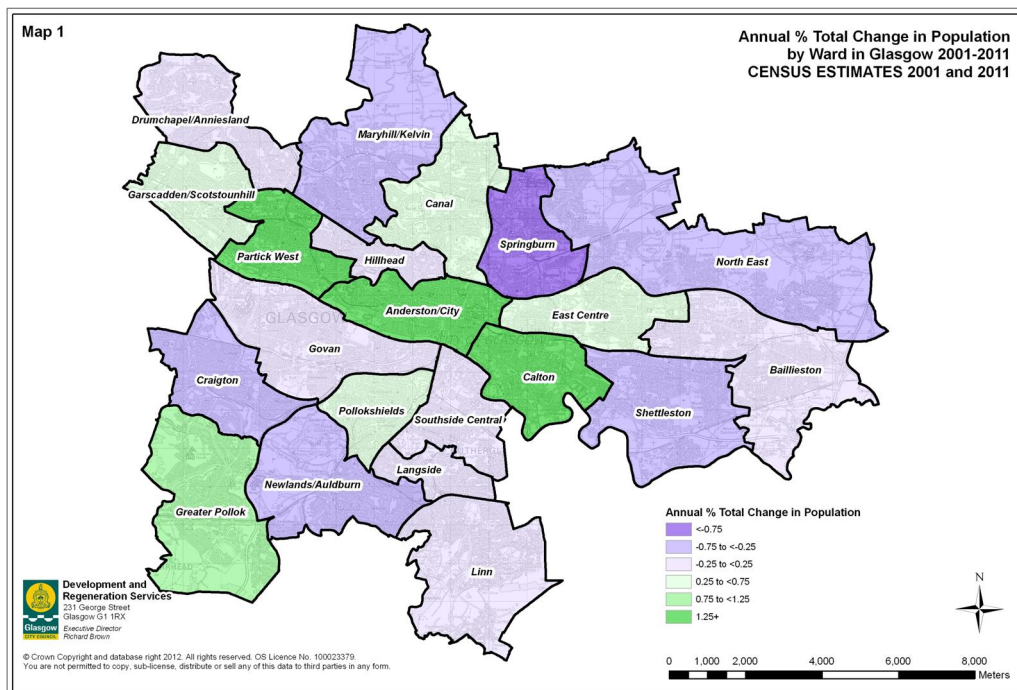

- 2.8 Glasgow has a higher percentage of single people (49.2%, Scotland: 35.4%) and a lower percentage of married people (30.8%, Scotland: 45.2%, see Appendix, Table A5). These are percentages of the population age 16+. Since 2001, the number of single people has increased and the number of married people has reduced in both Glasgow and in Scotland.

City-wide Household Change

- 2.9 The number of households in Glasgow has increased by 5.2%, from 271,596 in 2001 to 285,693 in 2011. The rate of increase is lower than in the rest of Scotland. In Scotland the number of households rose by 8.2% (see Appendix, Table A2).
- 2.10 In Glasgow the average household size fell by 2.9%, from 2.08 in 2001 to 2.02 in 2011. In Scotland the average household size fell by 3.5%, from 2.27 in 2001 to 2.19 in 2011.
- 2.11 Results are not yet available for the distribution of households by type (e.g. number of single parent households). This comes under living arrangements and is due to be released in December (release 2C).

Population and Household Change by Ward

- 2.12 ***The largest population increases between 2001 and 2011 took place in the City Centre Ward (Anderston/City: +34%) and in the Wards to the west (Partick West: +13%) and to the east (Calton: +14%) of the City Centre*** (see Map 1 below and Appendix, Table A10). In the South West of the City, the population in the Greater Pollok Ward rose by 11%.

- 2.13 The Springburn Ward had the highest rate of population loss (-10%). There were also significant population losses in the following Wards: North East (-5%), Shettleston (-4%), Newlands/Auldburn (-4%), Craigton (-3%) and Maryhill/Kelvin (-3%).
- 2.14 A comparison of the figures in Tables A10 and A11 (see Appendix) shows that the pattern of change in the number of households by Ward is very similar to the pattern of population change by Ward. In 2001-2011, there was a rise in the number of households of 36% in Anderston/City, with rises of 17% in Partick West and Calton and a rise of 12% in Greater Pollok. The number of households fell by 11% in the Springburn Ward.

Population and Household Change by Neighbourhood

- 2.15 It is clear, from Map 2 below and Table A12 (see Appendix), that the largest population increases took place in the following neighbourhoods: Broomhill and Partick West (+22%), Yorkhill and Anderston (+28%), City Centre and Merchant City (+36%) and Calton and Bridgeton (+28%). In the South and South West of the City, there was a sizable population rise in the neighbourhoods Pollok (+22%), South Nitshill and Darnley (+31%) and Carmunnock (+24%).

2.16 Easterhouse had the highest rate of population loss (-17%), to be followed by Sighthill, Roystonhill and Germiston (-14%), Balornock and Barmulloch (-9%) and Toryglen (-9%).

2.17 Again, the spatial pattern of change in the number of households by Neighbourhood is very similar to the pattern of population change by Neighbourhood (see Appendix, Tables A12 and A13)

3. ETHNICITY, LANGUAGE, IDENTITY AND RELIGION

Ethnicity

3.1 Ethnic minorities in Glasgow have grown by almost 50,000, from 41,900 in 2001 to 91,600 in 2011 (see Appendix, Table A1). As a percentage of population, this represents a rise from 7.2% in 2001 to 15.4% in 2011 (see Appendix, Table A3). This rate of growth has been considerably more than the national rate (Scotland: from 3.6% in 2001 to 7.1% in 2011).

Graph 3 - Population change by Ethnicity in Glasgow in 2001-2011

3.2 Graph 3 shows a fall of -34,400 for the population group “White British/Irish”. The population groups with the largest numerical increase have been “Other White” (+12,600) and African, Caribbean or Black (+12,500).

3.3 Other groups which have shown a considerable rise since 2001 are:

- Pakistani (+7,100)
- Chinese (+6,800)
- Indian (+4,500)
- Other Asian (+3,500)
- Other ethnic group (+1,800)

3.4 Not only has there been a sizable rise in Glasgow's ethnic minorities population, its' composition has also changed. Graphs 4A and 4B show that, for the BME population, the share of Pakistanis reduced from 50% in 2001 to 32% in 2011. Over that period, the population share has increased significantly for "Africans, Caribbean or Black" and for the Chinese.

Graph 4A - Glasgow's BME population by ethnic group in 2001

Graph 4B - Glasgow's BME population by ethnic group in 2011

3.5 The total “Other White” population in 2011 (22,900, see Appendix, Table A1) includes 8,400 “Polish” people and the total for “Other ethnic group” in 2011 (3,800) includes 2,600 people with an “Arab” ethnicity.

Comparison Glasgow with other UK Cities

3.6 In comparison with other Scottish Cities, Glasgow has the highest population share for the BME population (see Graph 5). The rise in the BME population share has been significantly higher than nationally for Glasgow, Aberdeen and Edinburgh (see Appendix, Table A8).

Graph 5 - Ethnic Minorities (BME) as % of population in Glasgow and other UK Cities in 2001 and 2011

3.7 Glasgow’s population share for the BME population (11.6%) is considerably less than for some English Cities, particularly Manchester (33.4%) and Birmingham (42.1%). The rise in the BME population share in Glasgow between 2001 and 2011 is similar to the rise in Leeds and Liverpool, but is considerably less than the rise in Birmingham and in Manchester (see Appendix, Table A9).

3.8 The size of the “Other White” population in Glasgow, at 3.9% of the population in 2011, is only marginally above the national rate (3.2%, see Appendix Table A3). The rise in the “Other White” population has been considerably higher in Aberdeen and Edinburgh (see Graph 6 and Appendix, Table A8).

Graph 6 - "Other White" as % of population in Glasgow and other UK Cities in 2001 and 2011

Country of Birth

3.9 Linked to the increase in numbers for ethnic minorities in Glasgow is the rise, of almost 40,000, in the number of people born outside the UK (as a percentage of population: from 5.7% in 2001 to 12.2% in 2011). Again, this rate of growth has been considerably more than the national rate (Scotland: from 3.8% in 2001 to 7.0% in 2011). For 2011 figures, see Appendix, Table A5.

3.10 The sizable rise in the number of people in Glasgow born outside the UK reflects increases in the number of people born in:

- Other Europe (+12,500, including +9,700 from EU Accession countries, April 2001 to March 2011)
- Africa (+9,500, including +4,800 from Central & Western and +4,000 from South & Eastern Africa)
- Middle East (+1,900)
- Asia (+14,700, including +4,800 from China, +3,400 from India and +3,300 from Pakistan)
- Americas and Caribbean (+1,500)

Language

- 3.11 Given the higher population share for ethnic minorities in Glasgow, it is not surprising that 2.7% of the population age 3+ (15,400 people), do not speak English well or at all and that this percentage is higher than for the Scottish population, at 1.4% (see Appendix, Table A5).
- 3.12 Almost 70,000 people, or 12.2% of Glasgow's population age 3+, use a non-British language at home. Again, this percentage is higher than for the whole of Scotland, at 5.6% (see Appendix, Table A5).
- 3.13 The number of people in Glasgow, who can speak, read and write Gaelic, has increased by around 18%, from 2,957 in 2001 to 3,476 in 2011 (see Appendix, Table A5).

National Identity

- 3.14 On national identity, Glasgow residents are similar to the Scottish average. 61.9% have an identity "Scottish only" (Scotland: 62.4%) and 16.1% have an identity "Scottish and British" (Scotland: 18.3%). The number of people with a Non-UK identity only is relatively higher in Glasgow at 8.3% of the population, compared with an all-Scotland figure of 4.4% (see Appendix, Table A5).

Religion

Graph 7 - Glasgow's population by Religion in 2001 and 2011

- 3.15 Graph 7 (see previous page) shows a sizable increase in the number of people with no religion and corresponding reductions in the number of people affiliated to the Church of Scotland and to the Roman Catholic Church. The increase in the number of people with no religion reflects a national trend (see Appendix, Tables A1 and A3).
- 3.16 There has been a rise in the number of people belonging to the Muslim, Hindu, Buddhist and Sikh religions, both in Glasgow and in Scotland.

4. HEALTH

General Health

- 4.1 In 2001, 60.2% of people in Glasgow classified their general health as “good” (67.9% in Scotland). In 2011, a slightly different question was asked, with more categories to choose from. Table A5 (see Appendix) shows that, in 2011, 77.5% of people in Glasgow classified their health as “good” or “very good” (82.2% in Scotland). This could suggest that people feel healthier in 2011, compared with 2001. However, it is difficult to draw firm conclusions, given the change of the question in the Census form.

Limiting Long Term Illness and Health Conditions

- 4.2 In 2001, 26.2% of people in Glasgow had a limiting long term illness (20.3% in Scotland). Similar to the general health question, a slightly different question was asked in 2011 on limiting long term illness, again with more categories to choose from. Table A5 (see Appendix) shows that, in 2011, 22.7% of people in Glasgow responded that they had a long term health problem or disability, which limited their day-to-day activities either a lot or a little (19.6% in Scotland).
- 4.3 Again, caution is required with drawing firm conclusions from the above, given the change of the question in the Census form. However, it is interesting to note that for Glasgow the LLTI rate has reduced, with only little change in the all-Scotland LLTI rate. This could be due to Glasgow’s population getting younger, relative to the population for other council areas in Scotland.
- 4.4 Results are not yet available from the long term health conditions question, which is a new question on the 2011 Census form.

Provision of Unpaid Care

- 4.5 9.1% of Glasgow’s population indicated that they provide unpaid care, which is similar to the result for Scotland (9.3%, see Appendix, Table A5). A comparison with results from the 2001 Census shows very little change: 9.8% for Glasgow and 9.5% for Scotland.

5. HOUSING AND ACCOMMODATION

Owner Occupied Sector

- 5.1 In Scotland there has only been a marginal reduction in owner occupation (from 62.6% in 2001 to 62.0% in 2011). In Glasgow the owner occupation rate has reduced at a higher rate (from 48.5% in 2001 to 45.6% in 2011, see Graph 8 and Appendix, Table A4).

Graph 8 - Glasgow's households by Tenure in 2001 and 2011

- 5.2 There has been a rise in the number of households “owning outright” and a reduction in the number of households “with a mortgage or loan”, in both Glasgow and Scotland (see Appendix, Table A2). “Shared ownership” has also seen a reduction between 2001 and 2011.

Social Rented Sector

- 5.3 Social renting in Glasgow has reduced from 43.1% in 2001 to 36.7% in 2011. That is a higher reduction than for the Scottish average. Social renting in Scotland has reduced from 29.4% in 2001 to 24.3% in 2011.

Private Rented Sector

- 5.4 Private renting has more than doubled in Glasgow, from 21,000 households in 2001, to 48,000 households in 2011. The rate of increase (+129%) has been higher than in Scotland (+100%, see Appendix, Tables A2 and A4).

Comparison Glasgow and Scotland in 2011

5.5 Graph 9 shows that, in 2011, the owner occupation rate in Glasgow (46%) is lower than the Scottish average (62%) and that both the social and the private rented sector are higher in Glasgow (see Appendix, Table A4).

Graph 9 - Households by Tenure for Glasgow and Scotland in 2011

6. CAR AVAILABILITY

Graph 10 - Glasgow's households by Car availability in 2001 and 2011

- 6.1 The car availability rate in Glasgow, i.e. the percentage of households with access to at least one car, has risen from 43.8% in 2001 to 49.2% in 2011 (see previous page, Graph 10) and the car availability rate in Scotland has risen from 65.8% in 2001 to 69.5% in 2011 (see Appendix, Table A4).
- 6.2 The number of cars available to residents in the City has risen by 23%, from 149,000 in 2001 to 183,000 in 2011 (see Appendix, Table A2).

Graph 11 - Households by Car availability for Glasgow and Scotland in 2011

- 6.3 Graph 11 shows that car availability in Glasgow in 2011, at 49.2% (= 100% - 50.8%), is considerably lower than in Scotland, at 69.5% (= 100% - 30.5%).
- 6.4 Relatively fewer households in Glasgow have access to two or more cars (12.4%), as compared with households in Scotland (27.2%).

7. ADDRESSING IMPLICATIONS OF THE CENSUS RESULTS

- 7.1 The results presented in sections 2 to 6 will have three main implications for Council services.
- 7.2 Firstly, ***Glasgow's population has become more diverse, both in terms of ethnicity and religion.*** This has huge implications for service provision by the Council and Partnership Agencies. E.g. attention was already drawn to a language issue, i.e. 2.7% of residents do not speak English well or at all (almost double the national rate, at 1.4%).

7.3 Secondly, ***Glasgow's dwelling stock has fewer owner occupied and more private rented dwellings***. This is of particular interest to the Council's housing strategy.

7.4 Thirdly, ***the City has a younger population age profile. The age group 16 to 29 makes up 24.4% of Glasgow's population (in Scotland: 18.5%)***. In view of that, it is crucially important that employment opportunities are available. This issue, together with any additional issues on the Glasgow economy, arising from the forthcoming Census results, is relevant for the Council's economic strategy.

7.5 The above are only some of the Census results with, potentially, important implications for Council services. DRS will raise this issue with the Corporate Management Team and will offer assistance, where required, to Council Services to identify the implications of the Census results for the services that they provide.

8. ANALYSIS OF CENSUS RESULTS – FUTURE PLANS

8.1 As already indicated (in paragraph 1.4) NRS plan to publish more detailed Census results, from early 2014 onwards. In order to inform the Committee of these results, and of potential implications for policy, DRS plans to submit the following two topic reports (in 2014):

- 2011 Census results and the Glasgow Economy
- 2011 Census results and Housing in Glasgow

8.2 The availability of Census data for small areas will enable the analysis to be done both City-wide and for multi-member wards and neighbourhoods within the City.

9. COUNCIL STRATEGIC PLAN IMPLICATIONS

<i>Economic Impact:</i>	A growing population in the City facilitates and requires economic and employment growth.
<i>Sustainability:</i>	N.A.
<i>Financial:</i>	Demographic changes will affect demand for service provision and Council expenditure.
<i>Legal:</i>	N.A.
<i>Personnel:</i>	Census data allows equality monitoring for the Council's workforce in terms of gender, ethnicity, religion and disability.
<i>Sustainable Procurement and Article 19:</i>	N.A.

10. RECOMMENDATIONS

That Committee note:

- the results, for Glasgow, of the 2011 Census releases 1 and 2A;
- the need to consider the implications for planning and service provision of recent changes in population and households; and,
- the DRS programme of further reports on the 2011 Census results, as NRS makes more releases of the Census data.
