30 March 2016

Dear Mr Hay

Environmental Assessment (Scotland) Act 2005 Glasgow City Council - The Clyde and Loch Lomond (CaLL) Local Flood Risk Management Plan (LFRMP)

Thank you for consulting Historic Environment Scotland on the screening report for Glasgow City Council's The Clyde and Loch Lomond (CaLL) Local Flood Risk Management Plan (LFRMP), received by the Scottish Government's SEA Gateway on 21 March 2016. I have reviewed the screening report on behalf of Historic Environment Scotland in its role as a Consultation Authority under the above Act, in accordance with the requirements of Section 9(3). In doing so I have used the criteria set out in Schedule 2 for determining the likely significance of the effects on the environment. Please note that our view is based on our main area of interest for the historic environment.

I note from the screening report that there will be no additional actions within this Local Flood Risk Management Plan (LFRMP) that have not been identified within the previously assessed parent Flood Risk Management Strategy (FRMS) undertaken by SEPA. Furthermore, I note that it is the Council's view that the level and detail of the assessment of the FRMS adequately covers the potential environmental effects of the plan and that the further detail within the LFRMP will relate to delivery and funding of the recommendations of the FRMS. In light of the information contained within the screening report I agree that the LFRMP in itself is unlikely to have significant effects on the historic environment.

However, as you will be aware, it is the responsibility of Glasgow City Council as the Responsible Authority to determine whether the plan requires an environmental assessment and to inform the Consultation Authorities accordingly.

Yours sincerely

Virginia Sharp
Strategic Heritage Management Officer, SEA
